

Resident Physician of the Month
March 2016

Dr. Lisa Lemieux
PGY 6, Developmental Pediatrics
University of Alberta

Lisa was born and raised in Edmonton, where she attended medical school. She completed a Pediatrics residency in Calgary, and worked at the Alberta Children's Hospital as a Pediatric Hospitalist for almost five years. Lisa was then called to pursue a fellowship in Developmental Pediatrics in order to follow the journey of her most complex patients after they "graduate" from acute care.

She is nearing the end of her subspecialty training with a group of tremendous professionals at the Glenrose Rehabilitation Hospital.

When Lisa is not at work, you can find her singing with Ariose choir, reacquainting herself with the Edmonton restaurant scene and painting her nails with her spectacular nieces.

A colleague had this to say about Dr. Lemieux:

“Dr. Lemieux is a fantastic resident who brilliantly demonstrates collegiality among various specialties and medical disciplines. During her pediatric rehabilitation rotation, she worked with Physiatry, General Pediatrics and Developmental Pediatrics, and was passionate about bringing specialists in each field together for teaching and clinical engagement in multidisciplinary environments. She gave a grand rounds presentation that was highly engaging – utilizing technology to allow the audience to participate using their smartphones – which is a tool that I have begun integrating into my own educational sessions. Her infectious enthusiasm makes for a positive work environment and a rewarding experience in the Developmental Pediatrics world.”

Congratulations Dr. Lemieux!
