

***Resident Physician of the Month
October 2017***

**Dr. Malika Ladha
PGY 2, Dermatology
University of Calgary**

I was born and raised in Edmonton. I started my undergraduate biology/sociology degree at the University of Alberta and then transferred to the University of Calgary for medical school. I am currently in Calgary's Dermatology program. I am grateful to be surrounded by supportive family/friends, talented mentors and a loving group of co-resident physicians who are absolute gems! Outside of the hospital/clinic, I enjoy writing,

swimming, cheering for the Oilers (sorry, Calgary) and exploring Calgary's culinary and arts scene.

A colleague had this to say about Dr. Malika Ladha:

"During my extension of clerkship, Malika reached out to me through the university, and offered help, experience and advice. She mentored and supported me, called me regularly, met up for coffee, and quite frankly was the single most helpful and useful resource I had throughout the extension process. I felt as if I was able to actually talk to someone who understood the emotional rollercoaster I was experiencing. Happily, I matched to my first choice this year, and I have no doubt Malika helped me get there. I am eternally grateful to her and think she deserves recognition."

Congratulations Dr. Malika Ladha!
