

February Resident Physician of the Month

DR. KRISTINE WOODWARD

Pediatric Neurology
University of Calgary

Growing up in Alberta, I grew to love this province and completed both my undergraduate degree and medical school here and am now a PGY5 in Pediatric Neurology. I love my job, from interactions with the children and their parents, to the relationships I have formed with colleagues. I am passionate about research and have been lucky enough to continue pursuing this in residency. I look forward to my fellowship in Pediatric Neurocritical Care to continue my research and work towards a career as a clinician scientist. When I'm not at work I enjoy camping, snowboarding, paddle boarding and hiking with my husband and dog, Juno!

A colleague had this to say about Dr. Woodward:

"Kristine has just completed an all-time record (for our program) of 2.5 years as Chief Resident Physician and we all feel that she is deserving of substantial recognition. As a Chief, she has been an exemplary leader who has made multiple positive changes to our program, such as re-organizing our call system. Kristine has also worked hard to maintain weekly high-quality educational rounds in our small program. She has balanced supporting her colleagues and her clinical duties while being incredibly productive in her research endeavours, with multiple publications and conference presentations in the past year alone. When she's not busy being the glue holding our program together, you might find Doctor Kristine running down the clinic hallway in a tight race with one of her adorable patients!"
